

Senior Machine Learning Engineer

Lahore, Pakistan (Hybrid) | Full-Time

ABOUT THE ROLE

We are looking for a Senior Machine Learning Engineer to join our AI platform team. You will design, build, and maintain ML systems that power our core product features including personalised recommendations, fraud detection, and demand forecasting. You will work closely with data engineers, product managers, and software engineers to take models from experiment through to production.

REQUIRED SKILLS

Python (4+ years, production-grade code)
ML frameworks: scikit-learn and TensorFlow or PyTorch
SQL and experience working with large datasets
MLOps: experiment tracking (MLflow), model deployment, and monitoring
Containerisation with Docker; orchestration with Kubernetes or equivalent
Version control with Git and familiarity with CI/CD pipelines

PREFERRED SKILLS

AWS SageMaker or equivalent cloud ML platform
Distributed computing with Apache Spark
Experience designing and running A/B tests
Familiarity with feature stores (Feast, Tecton, or similar)

KEY RESPONSIBILITIES

Design, train, and deploy scalable ML models into production environments.
Build and maintain data pipelines and feature engineering workflows.
Monitor model performance in production and implement automated retraining.
Conduct A/B tests and analyse results to guide product decisions.
Collaborate with cross-functional teams on problem framing and solution design.
Mentor junior data scientists and contribute to team coding standards.

REQUIREMENTS

4+ years of professional experience in machine learning or data science.
B.S. or M.S. in Computer Science, Statistics, Mathematics, or related field.
Strong communication skills - able to present model results to non-technical audiences.
Experience taking at least one ML project from research to production.

WHAT WE OFFER

Competitive salary with performance-based bonus.
Flexible hybrid working arrangement (3 days in office).
Dedicated ML compute budget and tooling allowance.
Annual learning and conference budget.
